

# WISCONSIN Master Naturalist

## 2024 Master Naturalist Volunteer Training at Bong – Registration Now Open!!

BNA is proud to once again be a host site/training center for the Master Naturalist Volunteer Training Program! The program is under the authority of the UW Extension System and training will be held at Richard Bong State Recreation Area (RBSRA.)

Classes will be held on Monday, Tuesday and Thursday, beginning Monday, July 8<sup>th</sup> and ending Thursday, July 18<sup>th</sup> (“Graduation Day”). Presenters are top tier and experts in their respective fields. The course involves 40 hours of training in natural history, interpretation and conservation stewardship.

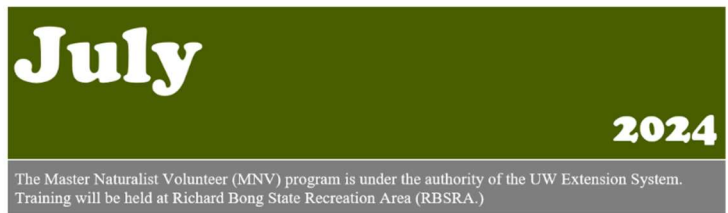

Once trained, a Wisconsin Master Naturalist provides volunteer service in one of three areas: education/interpretation, stewardship or citizen science. To maintain certification, volunteers must complete 40 hours of service each year and eight hours of additional training.

For more information about the Master Naturalist program, please visit [www.wimasternaturalist.org](http://www.wimasternaturalist.org)
